Modelo de Negócio

Proposta de Valor

Descreve os benefícios que os clientes podem esperar de bens e serviços.

Uma Proposta de Valor cria valor para um Segmento de Clientes através de uma combinação distinta de elementos que atendem às necessidades desse segmento. Os valores podem ser quantitativos (por exemplo, preço, velocidade de serviço) ou qualitativos (por exemplo, design, experiência do cliente).

Modelo de Negócio

Proposta de Valor

Elementos que contribuem para a criação de valor:

- 💎 Preço/Acessibilidade
- 💎 Novidade
- 💎 *Performance*
- 💎 Customização
- 💎 “Missão cumprida”

- 💎 Design
- 💎 Marca/Status
- 💎 Redução de custos
- 💎 Redução de riscos
- 💎 Conveniência/Usabilidade

Bem vs. Serviço

1) Propriedade não é transferida

Ao comprar um serviço, a propriedade do serviço não é transferida para o cliente final. Se comprar um carro, o carro é seu. Mas se comprar um bilhete de avião, o avião não é definitivamente seu.

Bem vs. Serviço

2) Intangibilidade

Como é que se mede um serviço? Num restaurante, a refeição pode ser medida, mas os esforços feitos para confeccionar a mesma refeição por dois *chefs* diferentes não podem ser medidos somente na ótica do cliente.

Bem vs. Serviço

3) Envolvimento do cliente

Ao comparar a diferença entre bens e serviços, temos de avaliar também o envolvimento do cliente também. Nos serviços, o envolvimento dos clientes é muito superior do que nos produtos.
